# SWITCH

Featuring a minimalist and attractive style to complement modern architecture, the monolithic entrance panel is a single product encapsulating all the requirements and options of a simple and flexible set-up.

# STRONG

Designed in Italy and made using brushed **316 stainless steel** for durability and resistance, the Switch entrance panel allows you to create an almost **infinite range of solutions**. **1 to 33** buttons are distributed over 1, 2 or 3 columns and a flush- or surface-mounted box (available to purchase separately) adapts the product to suit all installation sites.

The **2.5 mm** thick plate is one of the thinnest available in this entire category and it's **IK08** rated, while retaining the **convenience** of the removable nameplates on the front cover.

# VERSATILE

The same front cover is used for **digital 2-wire** systems and **ViP** systems alike. In fact, the **audio or audio/video** module is sold separately; it is particularly interesting to note how an audio entrance panel can be converted into an audio/video panel by **replacing** the module itself and the front grille (supplied with the product for both solutions *Ref. 1250U*).

The Switch entrance panel may be equipped with **accessories** that can be adapted with additional modules, such as **access control** (SimpleKey), **induction circuits** (T-Coil), a **keypad**, or **blank additional panels** to be engraved with apartment names or street numbers.

# SIMPLE

The Switch entrance panel comes complete with **pre-fitted, pre-wired buttons designed and manufactured** in-house (ref. 3061M and 3061S) which require no other work or button interface.

Button 3061 works as a **Master (M)** for all **2-wire digital and ViP systems**, with the pairing of no more than three **Slave (S)** buttons and expansion by means of other Master buttons with their own paired Slaves. The button is made using stainless steel, for quality and durability. Even the tiniest details are carefully designed so that the installed component remains flush with the entrance panel, while retaining the option of changing the nameplate from the front cover without having to remove or open the external unit.
