

Emergency and Help Point Range

At Comelit, your security is our top priority. We design cutting-edge emergency and help point systems that offer peace of mind and reliable communication when you need it most. Our ADA-compliant audio and video panels are crafted to meet the highest standards of safety and accessibility, seamlessly fitting into any environment—from parking facilities and hospitals to commercial buildings and public spaces. With easy installation and full integration into your security infrastructure, Comelit ensures that you and those you protect always Feel Secure .

COMELIT[®]
WITH · YOU · ALWAYS

EMERGENCY & HELP POINT SOLUTIONS.

Innovative, Accessible, and Secure Communication for Every Environment

Enhance Safety & Security

In critical situations, fast and reliable communication can save lives. Our emergency and help point systems provide instant access to assistance, ensuring safety for individuals in public or private spaces.

Immediate Access to Help

With just one press of a button, users can connect directly to security personnel, medical help, or other emergency services, providing peace of mind in any environment.

ADA-Compliant for Universal Accessibility

Designed to be inclusive, our stations feature braille, raised text, visual and acoustic indicators, ensuring that they are accessible to all, including people with disabilities. This makes them compliant with the latest safety regulations.

Rugged, Built to Last

Engineered with anti-vandal stainless steel, our systems are designed for durability, even in high-traffic or challenging environments like parking lots or public spaces.

VERSATILE APPLICATIONS

Across Multiple Environments

Elevator Lobbies

Enhance security in elevator lobbies where individuals may feel isolated or vulnerable. Our systems offer a direct line to assistance, ensuring fast response times in case of emergencies or technical issues.

Hospitals & Healthcare Facilities

In medical environments, every second counts. Our systems allow patients, visitors, and staff to call for assistance quickly, enhancing safety and responsiveness in critical moments.

Parks & Public Spaces

Create a safer public environment by offering visitors a reliable way to reach help during emergencies or for general assistance. Ideal for large open spaces where individuals may be far from help.

Commercial Buildings & Institutions

Boost safety in offices, hotels, shopping centers, and educational facilities with a system that provides direct communication to security staff, ensuring fast responses to incidents.

Parking Lots & Garages

Ensure safety and quick access to assistance in parking structures where emergencies can occur in isolated areas. Our help point systems provide immediate communication with security or emergency personnel.

Transportation Hubs & Stations

Our systems help maintain order and safety in transit areas like train stations and airports by providing clear communication for both emergencies and daily assistance needs.

NATIVE INTEGRATION

With new and existing Comelit door entry systems or in other existing IP networks

All of the emergency devices featured in this brochure utilize the same advanced technology as Comelit's door entry systems, ensuring full compatibility with your existing infrastructure. This means that our emergency communication solutions can be easily integrated into any Comelit system, allowing them to work effortlessly with components like switchboards at a concierge desk or security center. Whether it's for monitoring, assistance, or emergency response, adding these devices enhances the overall functionality of your system without the need for complex upgrades or modifications.

IT'S REALLY SIMPLE. FOR EVERYONE.

Setting up your apartment is easy and quick to do

To make sure your system is simple and straightforward to use, we have created a dedicated app, which is not only easy and quick to set up, but also very handy and intuitive to use. To set it up, simply scan a QR code. Via your smartphone you can receive audio and video calls remotely and open the building's front door.

ENSURING SAFETY

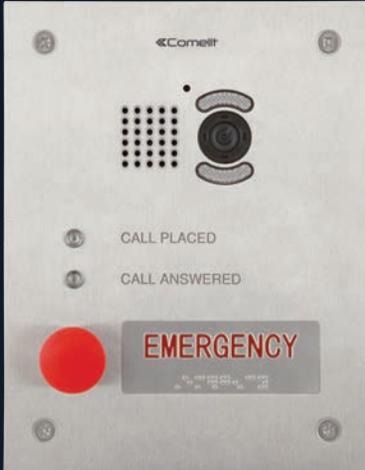

**UL 62368-1, 3rd Ed.
Certification**

At Comelit, safety is at the core of our product design and engineering. We are proud to announce that three of our emergency communication devices have been awarded the UL 62368-1, 3rd Edition certification. This globally recognized standard focuses on the safety of audio, video, IT, and communication technology equipment. By adhering to this rigorous certification, we ensure that our products meet the latest requirements for electrical safety and risk reduction.

The UL 62368-1 standard emphasizes hazard-based safety engineering, protecting users from electrical shock, fire, and other potential dangers. Our devices are designed to operate safely in a wide range of environments, providing reliable emergency communication without compromising safety.

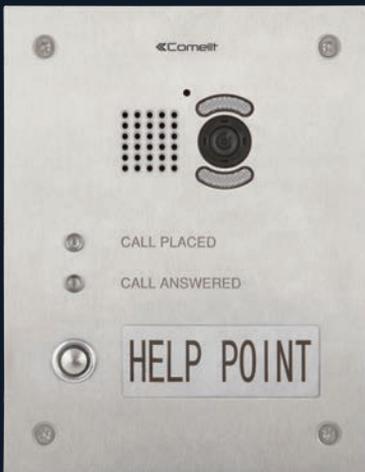

With this certification, Comelit guarantees that our systems not only deliver superior performance but also adhere to the highest safety benchmarks, making them a secure and dependable choice for any installation.

VIDEO EMERGENCY PANEL 3460HEV

Stainless steel entrance panel with a single call button and indicator LEDs for call forwarded and call answered. Complete with POE audio/video module for ViP system and flush-mounted box. "EMERGENCY" model with Braille text. Can be wall-mounted using accessory Art. 3461. POE entrance panel. Compatible with H.264 video format. Dimensions 228.6x177.8x3mm.

VIDEO HELP PANEL 3460HHV

Stainless steel entrance panel with a single call button and indicator LEDs for call forwarded and call answered. Complete with POE audio/video module for ViP system and flush-mounted box. Can be wall-mounted using accessory Art. 3461. POE entrance panel. Compatible with H.264 video format. Dimensions 228.6x177.8x3mm

AUDIO/VIDEO PORTER SWITCHBOARD 1952N

Tabletop audio-video porter switchboard with touch screen and alphanumeric keypad, for the simple and intuitive use of functions. Displays visitor images and the name of the user to call. Day/night mode and user/user intercom service. 12 VDC power supply with art. 43082 or direct from the ViP Ethernet network.

MULTI-USER GATEWAY FOR VIP SYSTEM 1456B

The Comelit 1456B Multi-Apartment Gateway for the VIP system provides seamless communication between entrance panels and internal units, enabling video entry calls to be answered remotely on smartphones, tablets, or monitors. Acting as a central station, it offers a rollover mechanism that redirects unanswered calls from the 1952N panel to other devices, ensuring every call is addressed. Supporting up to 15 devices per apartment and PoE functionality, it simplifies installation in large-scale setups. The 1456B is scalable, with license options for different user sizes, making it adaptable for projects of varying complexity and capacity.

CALL LOG SERVER VIP SYSTEM 1459

Server device for ViP system that allows the recording, storage and playback of calls from external units. Complete with Call-Log administrator software for settings (IP address, date, time, enable audio, video or audio-video recording, recording duration and recording storage time) and recording filters (days of the week, external unit making the call, internal unit receiving the call). Compatible with Windows operating systems. 19 Vdc power supply. Equipped with power supply unit with 100-240 Vac 50/60 Hz input and 19 Vdc output. Dimensions: 190x190x55 mm.

MOUNTING SOLUTIONS BY PEDESTALPRO

For seamless and professional installation of Comelit emergency communication devices, we recommend using mounting products from PedestalPRO, a leading provider of high-quality pedestals and mounts. Our devices in this brochure are shown mounted on PedestalPRO products, such as the 156STA-COME-01-ALU or 156TOW-COME-01-ALU pedestal. If you require reliable and durable mounting solutions tailored to your needs, we encourage you to contact PedestalPRO directly for purchasing and support. Visit pedestalpro.com for more information or to explore their full range of products.
